Organic Linden Water

INFORMATION ON SUBSTANCE / MIXTURE

INCI	Tilia vulgaris flower water
Latin name	Tilia x vulgaris Hill (syn: Tilia x europaea L.)
Manufacturing process	Aqueous phase resulting from steam distillation of flowers, 100% pure and natural
Part used	Flowers

TECHNICAL DATA

Physical and chemical parameters

Appearance	Clear liquid
Color	Colorless
Odor	Sweet, honeyed, slightly lemony
Relative density at 20°C	[0.990 ; 1.010]
Solubility	Soluble in water and ethanol, insoluble in oil

Biological parameters

Aerobic bacteria (TAMC)	< 1000 cfu/g
Yeasts and molds	< 100 cfu/g
Pathogens	Not admissible
Filter	0.2 µ, it may be necessary to perform a micro filtration before use.
Bacteriological stability	<p>Filtration at 0.2µm during manufacture and bottling in order to avoid contamination. Floral water matches the quality of non-sterile pharmaceutical preparations. Microbiological purity not guaranteed.</p> <p>The quality of every batch is controlled by the analytic laboratory of the manufacturer. This does not exempt customers to run their own bacteriological analysis upon reception of the commodity and before incorporation into a finished product. After reception of commodity and within a period of 14 days, without any complaints from the customer, our ingredients will be considered as validated and accepted by the customer. In this case, no refund or return of products will be accepted.</p>
